-- The MAILING DATE of this communication appears on the cover sheet with the corresponding address --

P riod for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 08 September 2003.
- 2a) This action is FINAL. 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) Claim(s) 1-10, 13-41 and 43-48 is/are pending in the application.
- 4a) Of the above claim(s) 2-9 and 13-41 is/are withdrawn from consideration.
- 5) Claim(s) _____ is/are allowed.
- 6) Claim(s) 1, 10, 43-48 is/are rejected.
- 7) Claim(s) _____ is/are objected to.
- 8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on _____ is/are: a) accepted or b) objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) The proposed drawing correction filed on _____ is: a) approved b) disapproved by the Examiner.
If approved, corrected drawings are required in reply to this Office action.
- 12) The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) All b) Some * c) None of:
1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. _____.
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 14) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
- a) The translation of the foreign language provisional application has been received.
- 15) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

DETAILED ACTION

The finality of the last Office action has been WITHDRAWN in view of the new ground of rejection below. The amendment of September 2003 has been entered.

Claims 1-10, 13-41 and 43-48 are pending. Claims 2-9 and 13-41 are withdrawn and Claims 11-12 and 42 are cancelled. Claims 1, 10 and 43-48 are examined.

The rejection of Claims 10-12 under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention is withdrawn in view of Applicant's amendments.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1 and 10 remain rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. This rejection is maintained for the reasons of record set forth in the Official action mailed 6/03/2003. Applicant's arguments filed 9/08/2003 have been considered but are not deemed persuasive.

Applicant asserts that description of a tocopherol cyclase from *Synechocystis* and a putative homologue of *Arabidopsis* defines the broad category of tocopherol cyclases that spans the groups encompassing all tocopherol cyclases from all organisms or all prokaryotic organisms (response page 4). The putative *Arabidopsis* tocopherol cyclase sequence of SEQ ID NO: 109, a sequence taken from a BAC clone, does not support the description of a genus of tocopherol

cyclase encoding polynucleotides because the specification and the prior art do not show any correlation between the *Arabidopsis* BAC sequence and the *Synechocystis* sequence, and the claimed prokaryotic unifunctional tocopherol cyclase activity and thus, Applicant has described only one tocopherol cyclase.

Claims 1 and 10 remain rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. This rejection is maintained for the reasons of record set forth in the Official action mailed 6/03/2003. Applicant's arguments filed 9/08/2003 have been considered but are not deemed persuasive.

Applicant asserts that the specification discloses how to make and use the claimed invention, including identifying tocopherol cyclase sequences, and that cells and plants have been transformed with the sequences of the present invention (response page 5). Applicant asserts that the Examiner has not indicated how the cited references of Broun, Doerks, or Smith suggest that such work would be undue experimentation (response page 6). The Examiner maintains that Applicant has not transformed plants with the *Arabidopsis* putative tocopherol cyclase gene, or evaluated the ability of this gene to either encode tocopherol cyclase or to restore tocopherol cyclase activity to knockout mutants. Applicant only transformed plants with *Arabidopsis* phytol prenyltransferase genes, which are non-cleaved. The references cited by the Examiner demonstrate the unpredictability inherent in predicting gene product activity based solely on its similarity to other sequences. In the absence of a definite function, Applicant has not taught how to make and use the invention as broadly claimed.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless

(c) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 10 and 43-48 are rejected under 35 U.S.C. 102(c) as being anticipated by

Lassner M.W. *et al.* U.S. Patent 6,541,259 filed April 14, 2000.

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Lassner teaches isolation of SEQ ID NO: 38 encoding SEQ ID NO 39 from a knock out mutant of *Synechocystis* sp. 6803 (slr1737) the cells of which produced no detectable levels of tocopherol in columns 25 and 26.

All Claims are rejected.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Russell Kallis whose telephone number is (703) 305-5417. The examiner can normally be reached on M-F 8:30-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Amy Nelson can be reached on (703) 306-3218. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0198.
